FULL STACK DEVELOPER

I'm a Full Stack Developer skilled in JavaScript, TypeScript, Flutter, Tailwind CSS, React, Next.js, Node.js, Express, NoSQL, SQL, and Puppeteer. I write clean and scalable code, and I stay up-to-date with the latest technologies to deliver innovative solutions.

I run a **Blog** and **YouTube Channel** where I teach concepts about programming and web development in general.

EDUCATION

2021 - 2024

Uka Tarsada University

Diploma in Computer Science

2024 - Present

C. K. Pithawala College of Engineering and Technology

B.E. in Information Technology

SKILLS

- Languages: JavaScript, TypeScript, Dart
- Frontend: React, Next.js, Flutter
- CSS: Tailwind CSS, Chakra UI, Mantine
- Backend: Node.js, Express, Nest.js, Prisma, Drizzle
- Database: MongoDB, SQL, Supabase, Firebase
- Other: Puppeteer

EXPERIENCE

Full Stack React Developer | Roofer.com, USA, Remote | June 2023 - May 2024

I handle the front-end part built with Next.js, React, Tailwind CSS & Shadcn UI with a team of experienced developers working on multiple production-ready web apps. The backend used was Supabase with serverless architecture.

Frontend React Developer | VertexDev, Australia, Remote | Contract

I contributed to the development of interactive and user-friendly web applications using React and Next.js.

PROJECTS

Prompt - Issue Management Web App

Freelance Project - Screenshots

An Issue Management Web Portal for an IT solutions company (name intentionally omitted) to track and create client issues, comment on them, and search them by client name. Additionally, a work-in-progress page to see what issues are being worked on for how long.

Easy Pastes

Personal Project - GitHub Repository

Easy Pastes is a web app where users can easily paste some code they want to share with someone with syntax highlight and even if they want to make it public, they can do so to show other people. More on blog.usmans.me/easypastes

WhatsApp REST API

Freelance Project

A REST API that uses WhatsApp Web in the background to send messages programmatically. Made for an IT Company (name intentionally omitted) for them to integrate it into their software to send WhatsApp messages programmatically. Another similar project which can handle multiple WhatsApp connections at the same time and do the processing on cloud.

AliExpress Order Extractor & Google Sheets Integration

Freelance Project

A web scraper built with Node.js and Puppeteer to log in user, extract each of their order information, tracking information and update a Google Sheet using the Sheets API every few hours automatically.

Hacktoberfest Project Finder

Personal Project - <https://finder.usmans.me>

A website for developers to find open-source GitHub projects to contribute to in Hacktoberfest. It has features of search, sort by factors, find by language, etc.

ACHIEVEMENTS

- **Winner** in Clerk x Hashnode Hackathon
- Award for **Best Solution Creating Impact on Academics** in Createo Hackathon 2023 at BBIT University, Anand
- Participated in Nativebase x iNeuron Hackathon, CHARUSAT Hackathon, Linode x Hashnode Hackathon, Netlify x Hashnode Hackathon etc.
